

# FAQ - Can I have negative labor entries?

## Question

Can I have negative labor entries?

## Solution

Unanet requires positive values in the timesheet for entry of time into timesheets in the user interface. The options below, however, allow for entry of negative values:

- The Unanet Historical Time Import.
- Adjustments to locked or extracted timesheets will create negative entries to back out the incorrect amount and create positive entries to apply the correct amount.
- Unanet paycodes can apply a negative cost rate factor to time, in order to see negative cost dollar values in Unanet reports. This can be adjusted under **Admin > Setup > Paycodes**.
