

# Unanet Announces Release 11.0.41

Release Date: 12/06/2019

This release contains the following defect correction:

- Corrected a problem with the table border disappearing on the TITO popup page. UNA-6159
- Corrected an issue where deleting all TITO entries could present the user with incorrect cell hover value. UNA-6156
- Corrected a pagination issue with the portrait PO Form report. UNA-5804
- Corrected Data Manager Time Import issues. Imports for employees fail if the employee's legal entity doesn't match the project's legal entity. Imports for non-employees succeed even if the non-employee does not have a legal entity. UNA-5869
- Changed UI to indicate email message template type cannot be changed after an email message template has been created. UNA-6213
- Corrected an issue where invoice did not account for bill rate override on document labor items. UNA-6149
- Corrected an issue that caused an error in Adhoc reports when selecting Project Organization Customer Profile UDF's. UNA-6259

This release contains the following enhancement:

- Added a new property to enable the ability to round Time In/Time Out fields using the timesheet owner's time entry increment, with a minimum increment of 3 minutes. UNA-6250.
