

Webinar - CSM Webinar - What is Unanet's Automated Analyst?

Title: What is Unanet's Automated Analyst?

Brief description:

Do you want the peace of mind that your business rules are followed, that data is both accurate and reliable with no added personnel costs? Unanet's Automated Analyst (AA) is the answer! The current AA catalog includes 60 standard quality checkpoints, monitors your Unanet data for consistency and adherence to your organization's unique business practices, and establishes business rules and data standards. This leads to more focus for managers on analysis and decision-making, which can have direct impacts on profitability.
