

# **FAQ - What is the best way to create a mapping of Cost Accounts between expense and project types?**

## **Question**

What is the best way to create a mapping of Cost Accounts between expense and project types?

## **Solution**

While the results of the mapping will be the same whether you approach the mapping from the Expense Type or the Project Type, it is most efficient to approach the mapping from the Project Type screen to minimize the number of screens you access.
